

OM3/OM4 LC Short boot Patchcords

LC patch cords supplied with a short boot are ideal for high density applications with tight space requirements. The connector length from tip to boot assembly is only 40mm. These patch cords have the added benefit of being supplied with reduced bend sensitivity OM3 or OM4 optical fibre which exhibits much lower optical power loss under bend conditions while remaining compatible with conventional cabling.

Feature

- Low insertion loss
- Good repeatability
- Mutual insert performance
- Good temperature stability
- Tensile strength

Application

- Communication system
- LAN
- Optical access network
- Data transmission
- Testing equipment
- Optical fiber sensor

Specification

Specifications	Parameters
Cable Material	LSZH
Crush (N)	1000
Insertion Loss (dB)	≤0.3
Repeatability (dB)	1000 Times ≤0.2
Operating Temperature (°C)	-40~+85
