

The bare fiber adaptor is a special style of fiber optic coupler that is mainly used for testing insertion loss of fiber pigtails and other fiber optic devices. It is one of the indispensable components in fiber optic testing applications. The product is also characterized by quick and easy assembly, small size, durability and long lifetime.

Feature

- Low insertion
- Excellent exchangeable
- High stability
- Easy to use
- High reliability

Application

- Telecommunication system
- CATV/LAN
- FTTH/FTTX
- Data transmission
- Testing instructure

Specification

| Specifications | Parameters |
|----------------------------|---------------------|
| Insertion Loss (dB) | ≤ 0.2 |
| Repeatability(dB) | ≤ 0.1 500Times |
| Tensile Load (KG) | ≥ 7 |
| Operating Temperature (°C) | -40~80 |
